* If you are a consortia, you additionally have the ability to choose any one particular site or all of the sites in the consortia.
* Ability to schedule report and have this e-mailed to you at a pre-determined date.

IP Address Usage Report

- IP address

* If you are a consortia, you additionally have the ability to choose any one particular site or all of the sites in the consortia.

Additional Information

Ability to View/Edit Scheduled Reports:

Administrator has the ability to access reports that have already been setup and to modify as needed. Additionally, it is not necessary to create two (or more)of the same report simply to be sent to multiple addresses. You may enter more than one e-mail address in the e-mail field. Simply use a semi-colon to separate the addresses.

Key Definitions

Abstract: a brief description of article content.

Database: a collection of periodicals available as a subscription.

Download: to request and receive a file, page or image from within EBSCOhost

Full Text: a term to describe articles that can be displayed in their entirety, as opposed to Abstract and References only. Full text can include text, charts, graphs and even images.

Hit: a single result or response received from an EBSCOhost server for a search.

IPAddress: the unique address (for computers accessing the Internet) that EBSCO may authenticate users with.

PDF (Adobe® Portable Document Format)**:** a universal file format that preserves all of the fonts, formatting, colors, and graphics of any source document.

Search: a single query made to an EBSCOhost server.

Session: the "state" initiated by the login process and maintained until the patron logs out.

Title: the name of a journal, magazine, pamphlet or book.

Formats of Reporting Outputs and File Structures

- HTML
- Comma Delimited Text File
- Tab Delimited Text File
